PROJECTS

Food Delivery Website – ReactJS, NodeJS, MongoDB

Feb 2024 – Apr 2024

- Developed a fully functional food delivery web application that enables users to explore a variety of restaurants and place orders online, enhancing user experience through an intuitive UI built with React.js.
- Integrated real-time order tracking and delivery notifications using Node.js, improving customer engagement and transparency.
- Designed and implemented a robust back-end with MongoDB to efficiently store and retrieve user preferences, order history, and restaurant data.
- Ensured a responsive, mobile-friendly interface using HTML, CSS, JavaScript, and Bootstrap.

Tech: HTML, CSS, JavaScript, Bootstrap, ReactJS MongoDB, NodeJS.

Travel App - Responsive Travel Website

Jun 2024 - Jul 2024

- Created a responsive travel website with an interactive and user-centric interface using HTML, CSS, and JavaScript.
- Implemented key features including user authentication, ticket booking system, and dynamic display of travel packages to streamline travel planning.
- Focused on improving frontend development skills, achieving enhanced performance and cross-device compatibility.
- Integrated basic back-end functionality with MongoDB to manage user data and booking records.

Tech: HTML, CSS, React JS, MongoDB

TRAINING

DATA STRUCTURES and ALGORITHM

Jun 2024 - Jul 2024

GeeksforGeeks

- Successfully completed a comprehensive skill development course on **Data Structures and Algorithms** offered by GeeksforGeeks, demonstrating a strong commitment to deepening core computer science knowledge.
- Gained proficiency in fundamental and advanced data structures (arrays, linked lists, stacks, queues, trees, graphs, etc.) and algorithmic techniques (sorting, searching, dynamic programming, recursion).
- Enhanced analytical and problem-solving skills through rigorous coding exercises and real-world problem scenarios.
